

Have you heard about F.E.T.C.H. ?
the initials stand for
For Everything That's Community Health

It is a website www.gabriola.fetchbc.ca

-where you can learn about all the services on Gabriola Island that support
community health and wellness

-visit the website to learn what resources there are currently on the island to
meet yours and your family's needs

This website is an initiative of the GPSC, the General Practice Services Committee, a committee of primary health care specialists from Doctors of BC and the Government of BC. There are 35 Divisions of Family Practice in BC that encompass more than 230 communities. Gabriola falls within the Rural and Remote Division of Family Practice which brings together family doctors from smaller and remote communities across BC to enhance delivery of rural health services.

There is a newly developed Health and Wellness Collaborative on Gabriola.

You can read about us on FETCH under the heading of Community Development Initiatives. There is a core group which meets monthly and one of the initial goals is to make the community aware of the FETCH website.
